

EDUCATION FOR EVERY CHILD

At Action Five, we believe that the principles of godly values and life skills development are at the centre of quality education. (Helping children Know who they are “First in Christ”, where they are going, and how to get there.

In our hearts, we are convinced that education empowers people and is associated with more peaceful communities, greater civic engagement, and stronger democracies

Since 1997 when UPE was introduced the government of Uganda has made efforts to improve access to education with stunning results. However, despite the progress, there are still too many children on the margins of education. We acknowledge that Uganda’s education system has expanded significantly as a result of several ambitious reforms but critical challenges remain including the country’s rapid population growth and limited participation in Education

Uganda’s Vision 2040 captures the aspirations of the government to convert Uganda into an upper-middle-income country by the said year. Such an objective would require significant improvements in the Education system of Uganda which must begin as soon as possible

As Action Five Schools we aspire to contribute to this ever-growing need of shaping the future that will invade, challenge and take the lead of the seven Mountains of Influence (Family, Education, Business, Politics, Media, spirituality, and Arts). These areas are moulds of how we think and influence our lives daily and so if the next generation is to make any significant impact on their time then we can’t be blind to the fact that **When children lack a basic yet standard education, we inadvertently abort the future we dream of”**

Like Malcolm X put it “Education is the passport to the Future, for tomorrow belongs only to the people who prepare for it today” and that is the dream of our schools at Action Five

Benefits to Kids

1. Empowerment through Education

Education empowers children with the knowledge and skills they need to break the cycle of poverty. By learning to read, write, and think critically, children gain the confidence to pursue their dreams and make informed decisions about their futures.

2. Improved Health and Well-being

Access to education often includes access to better health care and nutrition. Our programs ensure that children are healthy and ready to learn, which significantly enhances their academic performance and overall well-being.

3. Social and Economic Opportunities

An educated child is more likely to secure better job opportunities and contribute positively to their community. Education opens doors to economic stability, social mobility, and the chance to shape a better future for themselves and their families.

GET INVOLVED

Your support can transform a child's life. Whether you choose to donate, volunteer, or advocate for our cause, your involvement is crucial. Together, we can ensure that every child in Uganda has the chance to build a strong foundation for their future. Join us in making education accessible to all.
